new policies and requirements and gives you the chance to adjust your settings so that you can continue to work uninterrupted.

For more information about the Company Portal app for macOS, see [What happens when I install the Company Portal app and enroll my device?](#)

Before you begin

Your device must be running macOS 11 or later.

Note

During installation and enrollment, you might be prompted to allow Company Portal to use confidential information that's stored in your keychain. These prompts are part of Apple security. When you get the prompt, type in your login keychain password and select **Always Allow**. If you press **Enter** or **Return** on your keyboard, the prompt will select **Allow**, which means you may continue to receive prompts.

Install Company Portal app

1. Go to [Enroll My Mac](#).

2. Wait while the Company Portal installer .pkg file downloads. Open the installer when it's ready.

3. On the **Introduction** page, select **Continue**.

4. On the **License** page, read through the Microsoft Application License Terms. Select **Continue**.

5. Select **Agree** to agree to the terms of the software license agreement.

6. On the **Installation Type** page, select **Install**.

7. Enter your device password or registered fingerprint. Then select **Install Software**.

8. Wait for Company Portal to finish installing.

9. Open Company Portal from the Applications folder.

Important

Microsoft AutoUpdate might open after enrollment and update your Microsoft software.
